Hey there, fellow hackers! I'm offering a crypting service for just \$25 per crypt. We can negotiate. Here's what you get:

Before: <https://websec.net/scanner/result/e4ac254c-7d4e-44ea-b6a2-dba1d7113297>

After: <https://websec.net/scanner/result/ebc4f1cb-13fb-49d8-bdc7-8b5b30754f76>

Undetectable malware crypting - I'll make your malware virtually untraceable, slipping past even the most advanced antivirus software. 2. Custom-crypting solutions - Do you need something specific? I'll tailor the crypting to your exact requirements. 3. Fast turnaround - I'll have your crypting done and delivered ASAP.

Discreet transactions - All payments are handled securely and privately through cryptocurrency.

Excellent support - Got questions or need help with your crypt? I'm here to assist.

So, if you're looking to elevate your hacking game, hit me up. 25\$ crypts are a steal for the peace of mind and enhanced security my crypting provides.

I know a member that is waiting for a good crypter, but I need to know the runtime results for WD.

I've tested my oldest stubs, and they've been running for almost two weeks now without any issues. They're still mining on my personal setup, so the runtime performance is definitely Decent. But for the budget I Try My Best If you would like Have them message me If you Need more information im happy to help I love giving back and making things a bit more affordable but I would say best Crypter around Is Marlboro man If in the budget

MarlboroMan's crypter got taken down. Assumedly, new detection rules make it ineffective.
