That Borg one is awesome.

“Omnicutus of Borg”

Fucking A I love Star Trek.

Glad you like it man! I spent some time getting that one perfect. I used to watch star trek next gen every night it came on at 10pm when I was a kid. When the Borg captured the Captain and turned him into a Borg those were the best episodes. People got so emotional...?

Rsynced - June 8, 2025, 9:13 pm

Why would it get you banned? I don't understand? It's a compliment.

Which looking at your join date, surely?

I remember way worse things than some artwork in 2014.

I think it looks bad ass personally, I wouldn't of posted it if I didn't think it came out good.

[Omniscient](#) these glasses would look rather snazzy on you, when do you plan on getting your software updated so that the schematic for the alt quantizable six-four beam to add for 4 dimensional environmental scanning via ur eyeball?

Walter - June 8, 2025, 11:39 pm

Asked AI to do the work, then pulled up like "look what I made", lol.

It took me a few hours doing prompts to get all these images high quality. I use preexisting artwork / models / GFX / anything I can find and then imagine a scene and topic etc. I put a lot of creativity into these. The AI just does what i tell it to do, or at least most of the time, when I have to find a way to force it to do things it prohibits.

Mooooookie - June 9, 2025, 12:15 pm

Based off Omni's profile photo.. I think the second one you posted, looks more similar to his avatar. The first one, not so much.

I know you posts all these AI mocks ups, merely as a joke and with good intentions. I just wouldn't get too carried away with them, as I could see how too many of them could be frowned upon.

Nah bro.. I'm not saying to stop. I personally like them.. I think they're funny. I just noticed you got a warning for posting one previously, and some think they're LQ.. so I would just post them in moderation. But in no way am I telling you to stop doing what you love.. that's what makes you.. you!

You have good energy, and an overall positive attitude.. keep doing your thing champ.

Ok, I got a warning cause I was farming bytes in the AI section when it was giving out bonus bytes. Was not my intention but that's what the warning for for. Also sometimes I am a bit LQ.

Yes, I used his avatar and a picture of a 'star trek borg' action figure toy to make the AI picture.

To make awesome AI pictures you have to get creative, people keep saying to me that the AI does all the work, in fact it does not, it is just another set of tools like a paint brush, paint, and canvas to

an artist.
