Thread: [HyprMiner - Silent XMR Miner Builder](#)

ByteDoktor - June 9, 2025, 3:24 pm

THIS IS OLD THREAD, CHECK THE MARKETPLACE FOR NEW ONE.

This is my first release on the forum, i have been working on this project for the past few months in my spare time, it only has a few features at the moment but i have plans to include more i've just been busy with other things.

Features

Stealth Targets - When the user starts one of these programs it will pause the miner.

Remote Config - You can modify the config at time,

Idle Mining - if the user is active it will mine at lower % to avoid a noticable performance drop.

Stealth on Fullscreen - If the user starts playing a game in fullscreen the miner will be paused.

Future plans:

Create a panel or integrate with already popular panel.

Vouch copies are available and as always test in a vm.

[contract=tid]Start Contract[/contract]

Non-upgraded members can't share off-site communication :

10. Off-site contact methods (e.g., email, Discord, Telegram) are not allowed to be posted by non-upgraded members. Only members in the Vendor group may advertise or post Discord channels.

Non-upgraded members can't PM each others, it's a security measure to reduce scams.
Can't you use convo ?

Otherwise, think about upgrading, as a seller you will be taken more seriously too

"Non-upgraded members in Convo are required to make at least 10 posts in our forums, might we suggest our Lounge Forum. It's important you also take the time to read our [Help Docs](#)." ???

I just had some couple of questions and probably a good business deal, but before that i would need to know a few things.

Is the miner working in 24H2 Windows Versions?

You able to make custom options in the builder?

Stanley

Convo messages can only be sent if at least one of the members is upgraded. Upgrade here: <https://hackforums.net/upgrade.php>

Not sure if this is supposed to happen.

Are you making it free or you going to make it paid? also is it already released or is just a preview of what you doing?
