Thread: [Userscript: Remove HF Background Opacity](#)

xadamxk - June 10, 2025, 4:56 pm

I found it incredibly hard to read [this thread](#) with the font/background/opacity changes. This userscript makes the background solid again if it bothered anyone else. It should work on every page but feel free to modify as needed.

```
Code // ==UserScript==
// @name      HFBackgroundDeposition
// @version    0001
// @description Makes posts readable again - removes post opacity
// @author     You
// @match      https://hackforums.net/*
// @icon       https://www.google.com/s2/favicons?sz=64&domain=hackforums.net
// @grant      none
// ==/UserScript==
(function() {
  'use strict';
  document.head.appendChild(document.createElement('style')).textContent = '.wrapper-content {
opacity: unset !important; }';
})();
Screenshot before/after
```

Thanks for the share, I may use it, the font is so weird now, it messes with my glasses.

I am not a fan of the font either. If you add this line it should revert the new font

```
Code document.head.appendChild(document.createElement('style')).textContent = 'body {
font-family: Verdana, Arial, Sans-Serif !important; }';
```

I'm not sure if this is the best way to tweak styles or not but it seems to work for me

(Jun 10, 2025 05:23 PM)Natha Wrote: [\[CITE\]](#) Yeah I just put the following into Stylus. I personally don't want a new font but each to their own. I enjoy the classic MyBB fonts.

```
Code body {
  font-family: Verdana, Geneva, sans-serif;
}
```

Never heard of Stylus before. Sounds better than a js approach. Thanks

I like the new changes. I thought I was seeing things.

the background is of some kind of moons in space with dust and rocks.

The font reminds me of the terminal texts. ???
