Section names repeating + Strange overlay + High entropy + Section 0 ("") compressed]

Overlay: Binary[Offset=0x00af9800, Size=0x4d00]

Certificate: WinAuth(2.0)[PKCS #7]

Hello,

I'm looking for someone with the skills and experience to help me unpack an executable file protected with Enigma Protector x64 (version 5.0 to 7.0). Any support or guidance you can provide would be greatly appreciated.

Thank you for your time and consideration.
