Thread: [Looking for someone who can import stuff from India to their country.](#)

Hello guys, I'm thinking of getting an import export license and I can export any type of goods from here (India). If you have a marker for something in your country which is cheaper in india, I can export it from here.

Let me know if we can do something like this, I can export almost any kind of thing from India.

I can arrange to export almost any type of goods from India, so if you have any ideas or specific products in mind, feel free to reach out. Maybe we can work together on something!
