Hope everyone's been well! For those that don't know my absence is much attributed to my partner and I expecting our first child in a couple months, but miss you all.

When I released How to Make Money with AI, I didn't expect it to blow up like it did. Huge thanks to everyone here who read it, shared it, and used it to build something.

While testing one of the methods from that guide, I found a clear pattern: regular people launching small, focused tools and turning them into profitable microSaaS businesses. That insight led me to build this:

? <https://microsaas.guide>

It's a full playbook, dashboard, and toolkit for launching your own MicroSaaS product, no fluff, just what works. Currently exclusive to HF. Here's what's inside: Interactive Dashboard – Visual progress tracking, stats, and project overviews

Startup Calculators – Cost estimator, break-even, and feature priority tools

Goal + Progress Management – Milestones, analytics, and completion tracking

200+ Page Playbook – Strategies, case studies, and implementation guides

Command Center – All your tools, progress, and templates in one clean interface

Premium Templates – Ready-to-go landing pages (SaaS, Enterprise, Creative)

Authentic Resources – Real links to real tools, guides, and other resources.

This isn't a one-off drop either. I'm treating it as a living product, something I'll keep updating and improving over time, with free lifetime updates for anyone who grabs it now.

I'll give out vouchers on a case-by-case basis, probably no more than 2 or 3 though.

Appreciate the support so far. If this helps you build something, let me know, I'd love to see it.

If you're ready to get access, it's simple.

Hit the button below to start a contract.

[PURCHASE NOW](#)

More details are outlined within the contract itself, but the process is straightforward:
Once payment is received, I'll send you a personal access code to unlock the full dashboard and playbook.

Then head on over to ? <https://microsaas.guide> and use your access code.

If you've got questions before jumping in, feel free to DM me.
