Thread: [{ PS } Rain Animation !!! Cool](#)

Idiot #66 - April 2, 2009, 10:39 am

1. Open up a image

[img]http://img130.imageshack.us/img130/1195/obrazekrx6.jpg[/img]

2. Make 4 new layers and add noise-Filter/Noise/Add Noise..with these settings:

[img]http://img517.imageshack.us/img517/1594/noiseor6.jpg[/img]

with every new layer add 1% more amount (for example layer 1- 60% layer 2- 61 % layer 3 62% etc)

Then use Motion Blur tool -Filter/Blur/Motion Blur.. Setting:

Angle: 80

Distance: 30

[img]http://img243.imageshack.us/img243/1631/screenwx3.jpg[/img]

3. on each layer with "rain" we use Blending mode on screen like this

[img]http://img518.imageshack.us/img518/3835/irrw5.jpg[/img]

4 We now go to image ready

5 turn of the layer place we turn of the visibility of the layers with "rain" and leave only the background and layer 1

6 in the Animation tab we duplicate the first layer

[img]http://img145.imageshack.us/img145/9813/dupliod7.jpg[/img]

We repeat steps 5-6 and we get this thingy ;]
optimize save it and its ready

Yes you are a liar, look at riss's quote.
