XRP Market Activity Highlights Cloud Mining as 2025's Hottest Opportunity

XRP is currently trading at \$2.29, up 3.5% in the past 24 hours. Just recently, 50 million XRP tokens were also transferred from one unknown wallet to another earlier this Friday.

The post XRP Market Activity Highlights Cloud Mining as 2025's Hottest Opportunity appeared first on Cryptonews.

Ripple Labs does a good job with the media connections. 50m XRP is \$108m (maffs?).

The "news" from the feed is more like an ad for some mining company. If it continues to be those paid articles I'll remove the feed from Stanley's list.

Wait... wtf is this article?

What does a large XRP transfer have to do with cloud mining? Stanley is tapping into some real dumb AI slop here.
