Thread: [Android RAT APK issue](#)

FUD Master - June 13, 2025, 12:41 am

Expert opinion required pls. I am using an Android RAT (build customized by a developer). Its payload (apk was tested on Android 9 to 15 & was working good) after using one month , I realized today, that the app is not opening after installation (Its Chating APP) I tested the app on various phones but same issue detected. App is installing smoothly but Not opening for chat, signup or signin) What can be issue ? any solution please? The developer who coded that is not in contact now.

It would be easier to debug if you could provide the Android log, that often shows the issues.

Android RAT (build customized by a developer). Its payload (apk was tested on Android 9 to 15 & was working good) after using one month , I realized today, that the app is not opening after installation (Its Chating APP) I tested the app on various phones but same issue detected. App is installing smoothly but Not opening for chat, signup or sign in) What can be issue ? any solution please? The developer who coded that is not in contact now.

Hello I am also interested in a rat that works well for android 13-15.., about the error you comment, did you try to create the apk separately and then insert the payload?

FUD Master - June 13, 2025, 4:22 am

Thanks Everyone... Issue resolved.. It was Date restriction and i removed it. :D
