I need an invite, and a test credit.

Will buy if good, currently using 922.

How big is the proxy pool in US, zip code search is possible?

Can you forward proxy to a local port via the software?

Hello. Invite code - qfLU8NqA

To get a test balance - write to the support contacts, indicating your registration key.

No, the application works to get a proxy, then you can use it anywhere, it doesn't work through local port.

At the moment there is only sorting on these items, there is no exact search at the moment.

FIXED

There was a problem with temporarily disconnecting the connection, provided that many browser tabs open at once.

The system has become smarter, now there will be no connection stops!

Data is unlimited, but that doesn't mean you can host 50 websites at the same time! Everything has its limits.

Thank you for your understanding!

we ask everyone to express their opinion and share the results of the work.
