DramaKing - June 15, 2025, 2:50 pm

These news threads are pretty annoying, especially since they're not under News and Happenings where they belong. But heck. Cybersec students will love this.

There's almost zero information on it yet, and the NVD oddly describes it as a Kubernetes improper authorization flaw.

[Omniscient](#) it seems like Stanley post the same thread multiple times. Should be reported for multi posting ?

I think it's that feed. I'll try to find one that's better for CVE.
