Thread: [Upgraded to L33T](#)

I should have done this a while ago but late is always better than never I guess, My next goal is getting to Ub3r requirements then upgrading and once I do I want to try to host a giveaway for the community. Love you all! ?

Congratulations on the upgrade! Definitely a power move. Funny thing is, I said the same thing once I upgraded.. "why didn't I do this sooner?" - it's truly one of those things, that once you do it.. you see the true value in it, and get to experience the site in it's full glory.

Thank you to everyone, I know this isn't very dramatic but to me this means the world. Supporting this community does really mean a lot, I have learned many things from this community and hopefully I can learn more, prosper and teach my findings giving right back to this wonderful place.

Congratz buddy, I've had upgrades as well to my previous account, but I've lost it due to 2FA and it's been so long I don't mind starting fresh.

Well I am hopefully going to learn more, provide contributions and get to Ub3r so I can make some different games and other activities using the HF API with Bytes.
