CVE-2025-40916 - Mojolicious::Plugin::CaptchaPNG Weak Random Number Generation

CVE ID : CVE-2025-40916

Published : June 16, 2025, 11:15 a.m. | 21 hours, 54 minutes ago

Description : Mojolicious::Plugin::CaptchaPNG version 1.05 for Perl uses a weak random number source for generating the captcha.

That version uses the built-in rand() function for generating the captcha text as well as image noise, which is insecure.

Severity: 9.1 | CRITICAL

I must admit, being able to calculate and bypass captcha, not a 9.1 score in my opinion.

Also, this website includes so many ads..
