Thread: [Enjoy UNCENSORED AI For FREE](#)

**Moookie** - June 17, 2025, 10:22 am

This website offers truly UNCENSORED AI for free. Ask it anything, regardless of how derogatory, immoral, or unethical as you want.. and it will respond accordingly. I've pushed it to the limits for testing purposes, and haven't been disappointed to-date. Hopefully you will enjoy this too.

There are obviously some limits in regards to how many free messages you can send, but these limits can easily be bypassed by switching IPs with your VPN, and opening a new profile in your browser when you reach said limit. I use it.. now you can too.

Thanks, but I don't have 100 bytes. Can you send the method in DM or change the price for 50 bytes (discount -50%)?

**Jamika** - June 17, 2025, 11:11 am

It creates ai images too ?

**DramaKing** - June 17, 2025, 2:43 pm

You mean uncensored.com?

**jason123** - June 17, 2025, 2:48 pm

Nice but 100 Bytes for this is too much if actually you want to assist freely. Look into it.

An attachment doesn't seem necessary, but 100 Bytes is the minimum. It was 250 for a time.

Hmm. What browser are you using? And are you on Mobile, or Desktop? I remember getting a similar error one time while using the site, but I believe I was able to correct it by just opening in a new browser tab.

While I'm not associated with the site, and have no control over the functionality of the site.. if you're unable to get it working after basic troubleshooting.. I'll be happy to refund you the Bytes.

Used desktop Firefox application. They added a +18 filter. You have to but the premium to unlock the filter. Once you buy it all the images are not worth it sadly. And you can keep the bytes. Just was curious to see if the AI site was good enough to create HQ images or not.

I personally don't use the site for images. I use it for data/text, that. If you're looking for HQ images, with no flaws.. you're not likely going to get that from a free AI website. There are free websites that can generate 18+ images, but they contain flaws.

I would recommend you to do your research on different paid software if you're looking to generate HQ AI Images. Took my partner about 4-5 months of researching, before he found the right variety of software to create HQ AI images + video that didn't contain any flaws.

Bytes have been refunded to you.

Honestly you can "uncensor" any llm, even the cloud ones like claude, gemini or gpt, just need a crafty jailbreak and to not use them via their webui but the api (the web ui for openai has for example 15 THOUSAND tokens worth of instructions that is being sent before your every prompt, api has none) check out <https://rentry.org/jb-listing> for various jailbreaks

Not only am I sick of seeing multiple people breaking rule two, but also... what are you trying to figure out? You specifically put "free" in the title of this post and yet it comes with a price tag. That is correct yes?

"No respect for scammers" indeed lmfao.

EDIT: Ah I see, I misunderstood the bytes system and assumed it was simply a pay to gain type system as opposed to it being earnable profile points. Sorry, I'll try and familiarize myself a bit better with the intricacies of this site hahaha.

There are obviously some limits in regards to how many free messages you can send, but these limits can easily be bypassed by switching IPs with your VPN, and opening a new profile in your browser when you reach said limit. I use it.. now you can too.

I am working on a platform for windows that can run heretic models "non refusal", so people that have at least 4GB vram can run on their PC, no logs, no logins and no refusing - strata is nice but it requires 24GB vram to run properly. there are other models that are 1GB vram (but the intelligence of course is low) up to 32GB vram
