1 post.

This doesn't seem very legit ..

mikmik88 - August 22, 2010, 4:56 pm

Humhum Run Off To virtualbox !!

It is Rat's !

File Info

Report date: 2010-08-22 17:18:10 (GMT 1)

File name: simple-crypter-priv8-exe

If what Comodo says is right, it wants to access the internet through port 30606. High number for a

port...

And won't run in sandoxie. I mean will not open.

No errors or anything, just will not open

Pretty sure this is infected too.

I'll add more to the subject.

[Anubis Scan](#)

Can't get CWSnadbox and Threatexpert, gmail account is down. I appologize.

Plus, I knew that Icon looked familiar...

Xch4ng3 - August 22, 2010, 5:17 pm

Every generation you skids get more and more embarrassing.

This file is infected, if you downloaded it please visit the [White Hat section](#) where you will be provided with the correct instructions to disinfect your machine.
