[DEV] XENCLOAK LITE – AES/XOR Crypter + Memory Stub Binder (Preview)

Hey HF,

I'm finalizing a lightweight crypter/binder designed to cloak payloads with AES + XOR or ChaCha20 + Base85 encryption and launch via a RAM-only stub.

Status:

Internal testing – launching within 7 days.

I hope y'all like it when it drops. You'll receive:

Clean build (no watermark, no telemetry)

Unique stub

No leaks, no reposts

Stay cloaked.

**Nitrqxx** - June 26, 2025, 2:04 am

i would like a vouch copy if possible

**PlantagenetIV** - June 26, 2025, 12:43 pm

How would this not be detected in memory? Wouldn't you need something like an AMSI bypass?

**viperlog** - June 30, 2025, 11:46 am

How can I get this binder?

**OkikkIhb** - July 1, 2025, 12:28 am

Can you give me test first

**sdfhtg777** - July 12, 2025, 10:13 am

Unless you're certain the tools are malware-free, I wouldn't recommend posting them. Sharing a collection of programs without verifying their safety seems a bit like low-quality posting. Just my opinion.

**MadScientist** - July 12, 2025, 8:36 pm

Interesting, wish you the best with the project!

I'd be happy to help test it out.

**x64x86** - July 12, 2025, 9:13 pm

I'll take your software for testing. If you don't mind.

**patchdev** - September 4, 2025, 11:31 am

good job bro

**OkikkIhb** - September 6, 2025, 3:53 am

Hi can you give me test

No leaks, no reposts

Stay cloaked.

Do you have a POC for this?
