Thread: [Platform for hacking training](#)

Gofifo - June 23, 2025, 5:48 am

Do you have great platforms for hacking training ?

PS: No HTB or THM pls

Bastille - June 23, 2025, 6:13 am

These are actually the best in my opinion, why are you looking for other platforms ?

There is letesdefend.io for blue team stuff
cryptohack.org for crypto stuff
root-me.org general stuff
execism.com for coding / programming stuff

There are others but maybe provide more details on what you need and why you don't want HTB or THM ?

DramaKing - June 23, 2025, 7:08 am

Vulnhub.com for downloading boxes
Metasploitable virtual machine
OWASP Juice Shop
Parrot CTFs
HackThisSite

Igniter - June 23, 2025, 9:31 pm

Yo, if you're looking for some awesome simulated hacking platforms to get your skills on, check these out

Hack The Box as mentioned above
OverTheWire has Oldschool vibes.
Root Me Tons of hacking challenges, from beginner to expert level. They've got stuff on web, network, forensics, and more.
PentesterLab If you're into web app security, this site has a ton of learning for finding and exploiting vulnerabilities.
Ctf101 exploit stuff to get flags, and it's all legit.
You can basically go from noob to pro on any of these, so just dive in and get hacking! ?

tatanacigani - June 24, 2025, 10:23 am

i want to see how this work
