Thread: [Make 301 redirect gov and edu link in vietnam](#)

jaja2121 - June 24, 2025, 1:00 am

Hello, I am currently SEO a betting website in Vietnam (betting is illegal in Vietnam). Currently, people are using the method of spamming 301 redirects with keywords (brand, how to, etc.) related to betting using gov and edu domains. I want to know how to do this. Can someone guide me? Many thanks.

Here's how it works:

1. I search for a keyword related to betting.
2. The results from gov and edu domains are ranked high by Google (usually 1-2-3 on the SERP).
3. Clicking on these results redirects to a betting website.

You should know that gov and edu domains are very difficult to acquire in Vietnam, so it rules out the possibility that they bought these domains for this purpose.

Thanks for your support.
