Thread: [Could crypto crash in future?](#)

PuroPuro - June 28, 2025, 12:39 pm

What are you guys opinions?

Could crypto crash to zero one day and it'll be all gone?
Or is it so rooted in that it could never crash in a 100 years?

i'm a holder of crypto myself just curious

im holding big bag of sui and eth

Your asking the question of everyone that invests

Only answer you should remember is no one knows for sure like 100% its yes and no
Investing is gambleing you are betting against the odds that your assets dont eat a bag of shit
before you can pull out

before you can pull out
but what is your opinion on it ?
do you think its possible it would ever crash or no?

Omniscient - June 28, 2025, 12:54 pm

Most alts are going to near zero. Many are off their ATH's by 90% or more.

In the 2018 bull run a couple stand out as being top alts.

EOS -98%
ADA -57%
XLM -40%
IOTA -92%
LTC -61%

Mean while Bitcoin, up 510% since 2018.

Nothin even comes close to the long-term investment gains of Bitcoin because BTC is the crypto market.

what do you think about ETH ? nothing worth investing for?

so your saying its basically impossible for btc to crash one day ? major crash
