It seems OFM is the way these days. If you can work with a real model, it makes things much easier with custom verifications etc.

Same boat as you and sadly the only way is OF to be honest. Snapchat is such a pain in the ass as you can no longer send live snaps (shows a notification on the top that says media upload), they also have AI moderation now that detects keywords in the chat like sexting/sale/payment etc. And you constantly need to get aged accounts.

I highly suggest getting a girl to do OF and you do the traffic but that's again hit or miss.
