ChatGPT Predicts the Price of XRP, Pepe and Shiba Inu by the End of 2025

ChatGPT predicts the digital-asset sector has entered a renewed upswing as 2025 nears its end. Bitcoin's \$111,814 peak has steadied sentiment, and AI analysis sees XRP at \$5-7, PEPE 4x, SHIB \$0.00005, plus early-stage upside in Layer-2 token HYPER.

XRP will have trouble pushing above 6.50 imho. I am a Ripple fanboy too but cannot see it going much higher than this unless there's a massive spike in demand during the next cycle. Thanks for the updates though.

Been sticking with BTC only myself and have been in a better spot since. ETH looks extremely stagnant too.

Omniscient - July 1, 2025, 3:21 pm

The XRP and even Pepe predictions are just AI reflecting their userbase posting on blogs and social media.

CryptoNews feed sucks and I removed it today.
