Thread: [Need some tools and exploits](#)

HangonFriend - July 3, 2025, 4:05 pm

Hi everyone,

I'm a malware developer and I'm interested in trading my tools and knowledge with others.

I need new exploits and methods, and I can trade them with tools like C2, Ransomware, Keylogger, Stealer, ... and any knowledge I have in general.

Looking forward to trade some knowledge with you!

You can explore the market here for new tools and methods, but it's quite difficult to exchange ideas publicly in this thread.

Thanks for clarifying, my friend. I'm actually hoping to find a few trusted people so we can learn from and help each other. I'm new to this forum, and I'd really appreciate any help.
