Thread: [jjsam32 has Disputed a Contract with Br3@th \(5663451 \)](#)

jjsam32 - July 6, 2025, 11:45 pm

Contract Link: <https://hackforums.net/contracts.php?action=view&cid=403245>

Disputed Member: <https://hackforums.net/member.php?action=profile&uid=5663451>

I made a deal with him here on HF regarding the post i made on MiTM. I gave him the project i needed him to work and he came back telling me he has another option that's better than my project, My project was to fix my script and make sure it delivers to telegram. When he was unable to fix my script he gave me another option which he said was a custom made, Upon his finish i discovered it was a public evilginx. At that moment i begin to feel unsecure with him and ask him why is the ginx not deliver log to telegram, he said the only option i have is to copy from database. That was the moment i knew have already been scammed, its my fault for proceeding with him without not using a middleman. He might come here and argue he delivered what i paid for please ask him his it working as we discussed. This is just a head up for for any claim he wanted to made, I have a video record of all our chats and If given opportunity i would be glad to send it. Total payment made to the scammer was \$304 in litecoin.

*****UPDATE*****

This was our first conversation on my script <https://prnt.sc/AB-EF4abFAgZ>

This is when he promised to made a custom page script without letting me know its a pulbic evilginx script <https://prnt.sc/pU6b1Z41BSIp>

This was my agreement with him for the custom page script not evilginx

<https://prnt.sc/u6v8JzhxmmgG>

Both of us initially wants a middleman but he was late to respond <https://prnt.sc/T1eioT4rnO7k>

This was went i had to trust him cus of his commitment <https://prnt.sc/BcLVbRaTKcck>

This is the address i made first deposit 154\$ <https://prnt.sc/UnZ8k8RkDEFW> here is the confirmation <https://prnt.sc/GwQx59qE1Erw>

This was for his balance <https://prnt.sc/6pluNAoABhor>

He gave a public evilginx <https://github.com/SygniaLabs/evilginx3> with a phishlet which he never mentioned in our chats.

The public scripts <https://github.com/SygniaLabs/evilginx3> has been flagged by av also its over 4yrs old and not functioning for what I needed. Please DO NOT DEAL WITH THIS SCAMMER since his not getting BANNED.

Chrome - July 7, 2025, 12:39 am

Geez some of these HF contracts have shit details. I've seen a few recently that have incorrect monetary amounts or like this contract, \$0.

P??sonl?af - July 7, 2025, 1:10 am

Understand what you mean. When I make a contract I always try to add as much as detail as possible so there is no confusing.

Silver-lining: At least contracts are being used here! xD

Contract says you paid him 0\$ btc. How much did you pay him and is any of this conversation on HF convo or pm?

???????? - July 7, 2025, 7:19 am

He wanted to phish go daddy and Microsoft and the script he wanted to use was a crappy GitHub script so I setup evilginx for him and it works perfectly he agreed to it I showed him it worked then he started being a rude asshole I told him stop being rude or I won't help you then he lost his shit it still works he just don't know how to use it I offered to help countless time even after him being a baby but idk what his deal is all proof is below

<https://ibb.co/LX55rxPr>

<https://ibb.co/4RL8yt00>

<https://ibb.co/Y7XGStPP>

<https://ibb.co/mFNRPJZn>

<https://ibb.co/WNxJMJTn>

<https://ibb.co/Wpg9308t>

<https://ibb.co/MDdwXF68>

<https://ibb.co/NdGbkVfV>

<https://ibb.co/2YC8By3t>

<https://ibb.co/20tNbfCx>

<https://ibb.co/h1ZRJcC5>

<https://ibb.co/pr1YHmGd>

He really is not smart tho it shows the same thing in his "video" so not entirely sure what he's trying to prove besides showing that I tried to help and he became a asshole

Proof that is works POC:

<https://ibb.co/xqnBbDRn>

<https://ibb.co/xbCtf1F>

<https://ibb.co/9mW1Bnqv>

<https://ibb.co/w8tF4xW>

<https://ibb.co/5X6mxqDP>

<https://ibb.co/Pv1CQQR6>

<https://ibb.co/DfBQLnHc>

<https://ibb.co/FZxPHz2>

Captures full cookie username and email as he asked to do

The only thing that didn't work was forwarding to telegram bot cuz evilginx monitor was not working however I told him could export the db file in /root/evilginx2/data.db and he would have a notepad

Bro is just simply lazy as shit this is fully functional and working with no error even after him being a douchebag I still offered to help and he refused to help so I don't know what else he wants everything works I've told him what to do offered to help again via Anydesk but he's just lazy and opened this for no reason it will show the same thing in his video I have nothing to hide funny how he didn't post the video right

jjsam32 - July 7, 2025, 7:56 am

Admin he has been flooding my telegram because I had too much video proof to backup my claim <https://prnt.sc/KNRQogTKkfgw>. He think his smart but he mess with a wrong person. Admin how can i send video conversation of us with proof of payment made to this scammer.

???????? - July 7, 2025, 7:58 am

(Jul 7, 2025 07:56 AM)jjsam32 Wrote: [\[CITE\]](#) Admin he has been flooding my telegram because I had too much video proof to backup my claim. He think his smart but he mess with a wrong person. Admin how can i send video conversation of us with proof of payment made to this scammer.

I spammed his telegram cuz he wouldn't shut up talking about his bs video proof please post it here send it to admin do whatever

It works just fine I showed POC

This is a pretty straightforward case

jjsam32 - July 7, 2025, 8:11 am

Admin here is my proof and if you need video proof, i record when he was installing the public shitty script he called custom.

This was our first conversation on my script <https://prnt.sc/AB-EF4abFAgZ>

This is when he promised to made a custom script without letting me know its a pulbic evilginx script <https://prnt.sc/pU6b1Z41BSIp>

This was my agreement with him for the custom script not evilginx <https://prnt.sc/u6v8JzhxmmgG>

Both of us initially wants a middleman but he was late to respond <https://prnt.sc/T1eioT4rnO7k>

This was went i had to trust him cus of his commitment <https://prnt.sc/BcLVbRaTKcck>

This was for his balance <https://prnt.sc/6pluNAoABhor>

I really do not need a refund at first but at this moment i'm ready to use it as a gift for HF.

If admin can recover the fund, please i donate it as a gift to HF and this scammer must be ban on HF.

???????? - July 7, 2025, 8:40 am

I really do not need a refund but I do not want anyone to fall for his crap over here.
That was gonna be for a scam page which serves the same purpose of evilginx honestly evilginx is
better
Did you ignore the POC in my reply above?
You are so determined you've been wrong I bet money I could log on the vps rn and you don't even
have the scripts enabled
I've offered countless times to help you
But you just wanna be a cunt

I asked you what your goal was and you told me you accepted evilginx you could of said no I don't
want to use that and I would of been ok with that but you did not care you wanted one thing and one
thing only email password and cookie and as you can see in the POC above that's what you got

I am not sure why you are so dead set on thinking I wronged you when your own "proof" shows you
being jackass the video one not the one you posted you don't want to post the video because you
know it will make you look bad and probably get limited for abusing the contract dispute

All my evidence shows everything and so dose your video

Let me reiterate that I can bet you don't even have the scripts enabled you didn't even know how to
start evilginx You asked me the command to start it ... that should go to show you have no idea
what you are talking about
Again I tried to help but you wanna be rude
Even after arguing I offered to help you AGAIN and you continued to be rude

You got exactly what you paid for
Enable the scripts and use them

You keep ignoring that they work lol
You keep denying help

P.S To all my fellow coders or people with basic Linux knowledge here is the video he sent me that
said was "Proof" of me installing a shitty public script I installed go-lang to build evilginx ?
But he thinks it's a public shitty script

<https://streamable.com/9d4gta>

Admin from his words you can see how he relate with his client. He lacks sense of humor, he only know how to cheat his client. No one or any member of HF deserve this kind of employee, I paid thinking his real not knowing he was so fake.

Like I said i do not want a refund the refund should be for HF not me. I just want you to know how to talk to client and keep your words. This is my last message to you and I've already block you on telegram thanks for the ddos, Admin if given chance he will ddos this thread for you not to focus on the "custom script" he promised not evilginx. You such a little mind person and I wished you bad for playing on my trust.

Bro you thought go lang was a shitty public script ?

<https://streamable.com/9d4gta>

Bro it works just enable the scripts

<https://ibb.co/Xff4mFyf>

<https://ibb.co/mVsGVW1K>

<https://ibb.co/CKGT76vb>

I showed you it works you seen it work live just fine

You only had issues and complained when I installed the godaddy and outlook scripts you know cuz you didn't enable them

And in telegram you stated you been using evilginx but don't know how to use it hmm?
You asked me how to start it something's not right
You've stated multiple times that you don't want a refund

I think your just mad I called you rude and said if you keep being rude then I would give support
now you in a blind rage cuz your stories don't match up

Also what DDoS bro you are tripping rn if you are referring to telegram spam that's no DDoS if I
ddosed you then you wouldn't be here

Spend a whole 30 seconds and enable them for him? He paid for a working/setup script?

I looked through all of the post and what really happened here is OP hired Br3@¢h to fix a custom
script he had and he failed.. So it seems he just dumped a random free script on Jsam32 and \$300
for that? I'm 100 percent on Jsam32's side for this one.

????????? - July 7, 2025, 9:13 am

He paid for a working/setup script?
Well if you would of read previously where I stated multiple times that I offered to help him over and
over dispise him being rude you'd see I tried

The original one I showed him and set it up for him he got a working script

It's one command

Phishlets enable (Phishlet name)

But he don't wanna do that instead he wants to argue

When I installed the new scripts I told him stop being rude or I am not gonna provide support we go back and forth and then I still offered to help him

Did you read the screen shots or proof or anything?

I made sure it was fully working before he sent the final payment and he confirmed it

A custom script op had? Are you illiterate? It was a public GitHub POC
<https://github.com/nicolonsky/AzureAiTMFunction/>

His main goal was to phish outlook godaddy and Microsoft
Clearly you have no understanding of how phishing works and WHAT PUBLIC SCRIPT????

In that video that's go lang do you not understand that you need go lang to build evilginx??????

Jimmie - July 7, 2025, 9:18 am

He paid you to fix HIS script and you failed you keep going on about this replacement script that wasn't the deal. And regardless if he agreed to try this new script you still failed to give him a working product if someone pays you to set something up then you fully set it up, test it plus \$300 for 15 minutes of work? That is ridiculous he should at least get about a \$250 refund.

original working that you was actually paid to fix?

First off it's not a script it's a public repo for POC of azure

Secondly I asked him what his goals where and what he wanted to accomplish

You should really do more homework or come here more knowledge before starting shit

He told me his goals and I gave him options and suggestions because he kept getting his domains flagged so I gave him alternatives to help with that one was a scam page the other was evilginx and he wanted 3 main things

Email password and cookie I told him evilginx is best he said ok to it and we continued and it works

I don't owe you any explanation I owe the administrator Omni one

But calling everything scripts having no knowledge of any of this maybe don't come here and start shit or "guess" when you should ask questions first and educate yourself before rambling

(Jul 7, 2025 09:26 AM)Jimmie Wrote: [\[CITE\]](#) I'm talking about the OG script he actually paid you to install what happened? No where near full rampage mode you are just ignorant and don't understand what's going on And just spamming words

Omni is a coder and a good one at that when he reads this he will know and see from the pics and poc and chats etc who's right and who's wrong

And the ignorant comments will render meaningless

You are just flaming lol

jjsam32 - July 7, 2025, 11:05 am

Op All i wanted was a justice, Like I said i do not want the refund i would rather give to HF as a gift. I will like to see the user to never smell HF any longer, His rude coward lack customer relation and is very new here. Please admin do the justice.

(Jul 7, 2025 08:49 AM)Br3@Ch Wrote: [\[CITE\]](#) Bro you thought go lang was a shitty public script ?

All he wanted was to steal from me.

First off you called your self op ?

Op means original poster goofy you are the OP

Secondly I am truly amazed how yet such a simple command could fix all this yet you refuse to do it

Let's go back to the screenshots you said that you have used evilginx before yet you didn't even know the command to start it and ofc evilginx is public when I said custom script I thought you were smart enough to realize it was a custom Phishlet clearly I was wrong which brings me back to your story not adding up if you used evilginx before you would know it's a public framework

That's not a script what the hell is wrong with ppl everything is a script to you Imfao

The Phishlets were custom

You are telling people to view the video you sent me that I posted of me installing go lang

Go lang is a program language not a script

Like you are not understanding this your disputing nothing

There's proof it works I offer to help you reject you don't want help you don't want a refund you don't even know what you are talking about to even dispute this

There is no justice need to be done you got what you paid for you just drunk or something and refuse to accept the help you wanted to be rude to me I told you to stop or I wasn't gonna help then you lost your shit

You have to be no more than 16 years old

You do realize Omni built HF all his plugins he made himself you realize that he has years and tons

of experience you do also realize he will see the POC that it works and there is nothing to dispute here

Also am I the only one here who dose due diligence there was never a occasion of where I failed to set up his GitHub POC I simply asked his goals to offer something that would accomplish that in a better way he recorded the entire chat from start to finish you can read all of it NOT ONE time did anything about me failing to set up the Azure POC occurred I asked his goals and gave him options I was gonna do a scam page but found evilginx to be the best option for what he wanted done

<https://ibb.co/nNzDJzqL>

<https://ibb.co/T5KKMH0>

<https://ibb.co/7xnyzvHf>

<https://ibb.co/ZRy5dgNC>

Never failed at anything again IT WORKS and DOSE WHAT YOU WANT IT TO

so what is the issue?

jjsam32 - July 7, 2025, 1:46 pm

Since you are running mad i will post our conversation video.

Admin in the video you will see he changed the story after i did made first deposit and he insist on giving me another script. I never wanted it but i do not have a choice because i've already sent him 154\$ ltc.

Please take a look at the video and please do justice.

<https://streamable.com/tqw8pg>

The evilginx script he run was a public and not the custom page he promised to do.

In our conversation you will see how rude and senseless human being he his.

We do not deserve ungrateful animal among humans especially here on HF.

(Jul 7, 2025 01:46 PM)jjsam32 Wrote: [\[CITE\]](#) Since you are running mad i will post our conversation video.

Admin in the video you will see he changed the story after i did made first deposit and he insist on giving me another script. I never wanted it but i do not have a choice because i've already sent him 154\$ ltc.

Please take a look at the video and please do justice.

<https://streamable.com/tqw8pg>

The evilginx script he run was a public and not the custom page he promised to do.

In our conversation you will see how rude and senseless human being he his.

We do not deserve ungrateful animal among humans especially here on HF.

Thanks for proving me right

You didn't read anything that was said evilginx is a framework not a script the Phishlets were custom

You accepted evilginx the Phishlets were custom

You were fine until I told you don't be rude

Then you became unhinged but thanks for finally sharing the entire video nothing more to say

There is proof that it works on the first page of this

Real coders can easily tell the difference easily

Omni will decide

(Jul 7, 2025 12:44 PM)Br3@¢h Wrote: [\[CITE\]](#) First off you called your self op ?
Op means original poster goofy you are the OP

Secondly I am truly amazed how yet such a simple command could fix all this yet you refuse to do it

Let's go back to the screenshots you said that you have used evilginx before yet you didn't even know the command to start it and ofc evilginx is public when I said custom script I thought you were smart enough to realize it was a custom Phishlet clearly I was wrong which brings me back to your story not adding up if you used evilginx before you would know it's a public framework

That's not a script what the hell is wrong with ppl everything is a script to you Imfao

The Phishlets were custom

You are telling people to view the video you sent me that I posted of me installing go lang

Go lang is a program language not a script

Like you are not understanding this your disputing nothing

There's proof it works I offer to help you reject you don't want help you don't want a refund you don't even know what you are talking about to even dispute this

There is no justice need to be done you got what you paid for you just drunk or something and refuse to accept the help you wanted to be rude to me I told you to stop or I wasn't gonna help then you lost your shit

You have to be no more than 16 years old

You do realize Omni built HF all his plugins he made himself you realize that he has years and tons of experience you do also realize he will see the POC that it works and there is nothing to dispute here

Also am I the only one here who dose due diligence there was never a occasion of where I failed to set up his GitHub POC I simply asked his goals to offer something that would accomplish that in a better way he recorded the entire chat from start to finish you can read all of it NOT ONE time did anything about me failing to set up the Azure POC occurred I asked his goals and gave him options I was gonna do a scam page but found evilginx to be the best option for what he wanted done

<https://ibb.co/nNzDJzqL>

<https://ibb.co/T5KKMH0>

<https://ibb.co/7xnyzvHf>

<https://ibb.co/ZRy5dgNC>

Never failed at anything again IT WORKS and DOSE WHAT YOU WANT IT TO

so what is the issue?

Admin everything he said here is on video record how he manipulate me to accept his custom script and later called it phishlet, After i approached him its evilginx he still insist its a custom page after i

did made first deposit.

He said "Also am I the only one here who dose due diligence there was never a occasion of where I failed to set up his GitHub POC" Please take a look at the video chat carefully you could see how dumb he his <https://streamable.com/tqw8pg>.

Learning English and understanding it, its a way two different thing. I can see you so blind to read and your arrogant can't make you see where you were wrong. Like I said the money you stole is for donation to HF if refunded back and also you should never be allowed to use HF any longer. You are part of those that want steal from community without a proper sense of thinking. You lack knowledge and wisdom is far from you. I wish you wake up before you die sleeping.

Why didn't you include the correct details in the contract? This issue has been ongoing for some time, and it's time to make a decision.

The contract does not specify that you did not want evilginx, nor does it include any terms.

This should serve as a lesson for you and everyone else to always include terms and proper details of what you are buying or selling in the contract.

I believe the buyer received what he paid for, while the seller was also compensated for what he was selling.

[Omniscient](#) also a suggestion to edit thread title with the new username if the disputed party changes their username or just block username change for either party if a dispute is ongoing
