Show me a "PDF exploit," and I will show you a scam.

<https://hackforums.net/showthread.php?tid=6295400> will give you everything you need with the best real payloads. There's a lot of disinformation floating around about cybersecurity.

A tool that embeds .hta files with a hook similar to BeEF in PDFs being sold for way under market value? Not what OP asked for. Didn't even understand the end of the video. I doubt that it's 100% a scam, just mostly. Also, pasting a link and adding nothing else does not meet posting requirements.

Just have to have a message with the PDF that says "Requires Adobe Acrobat Reader 9.3.1," right?
