Thread: [\[FREE TEST\] SQLI INJECTION TOOL](#)

ZEKAI SHUI - July 13, 2025, 8:43 pm

Hi, everyone.

I want to launch a free test program for SQL INJECTION TOOL. I recently built a tool for sql injection integrated by SQLMAP.

Here are the screenshots

Here is the video

As you can see, there are a lot of functions in this tool

Scan Valunrable URL(integrated by SQLMAP)
Extract databse/table/ and data
FAST SCAN/BULK SCAN
Better detection rate than any other tool like(sqlidumper)
.....

Right I am working on the WEB API VERSION (it has faster and smoother experience THAN ctk UI python version)

IF someone is intereted in test this tool, just DM me , I can give you the test key for this tool.(ENGLISH VERSION)

The offical version will realease around during AUGUST

LESS than 30 USDT for monthly sub but more like a donation, cuz I think the test version will be cracked for sure. I may realse the source code for this version(CTK UI)
