Where to find courses on cryptojacking?

DramaKing - July 17, 2025, 5:33 am

(Jul 17, 2025 04:09 AM)Borris5ranked Wrote: [\[CITE\]](#) Where to find courses on cryptojacking?
Nowhere. No one gives courses on that.

Err0rX - July 17, 2025, 6:24 am

Yeah, you won't find that here — or anywhere else, trust me

DramaKing - July 17, 2025, 7:07 am

The main reason is that it's just cryptomining ... illegally. Unlike something more complicated like simjacking, it's just mining and malware spreading.

Here's the calculation I give people though:

Silent miner = Cost varies

Crypter = Lifetime private crypters are serious cha-ching and may lose effectiveness, so their lifetime may not be long

Run time = You only want to mine or mine at full usage when the jacked systems are awake and idle

Hold time = Bots may only last weeks or a few months

Prison time = Maybe five years

Cryptojacking gives you almost nothing, and if you get caught, the consequences hit hard. it's just not worth the risk or the effort.

is crypto jacking infecting thousands of pc with malware and the mining? using their bill? botnets?

DramaKing - July 18, 2025, 3:31 am

Good luck getting that many at once today.

Err0rX - July 18, 2025, 8:27 am

Yes, it involves silently infecting machines to mine crypto without the owner's knowledge.
It's like a passive botnet — no attacks, just pure resource drain for profit.
But trust me, good luck gathering that many without being discovered.

It have source he can learn from idk

Rax_ - July 18, 2025, 11:30 am

I was under the impression crypto jacking was stealing already owned crypto, by gaining access to wallets/accounts not mining with bots?

DramaKing - July 18, 2025, 12:24 pm

(Jul 18, 2025 11:30 AM)Rax_ Wrote: [\[CITE\]](#) I was under the impression crypto jacking was stealing already owned crypto, by gaining access to wallets/accounts not mining with bots?
Never heard that before. That's called stealing wallets or draining or just stealing crypto.

Rax_ - July 18, 2025, 1:14 pm

(Jul 18, 2025 12:24 PM)DramaKing Wrote: [\[CITE\]](#) Never heard that before. That's called stealing wallets or draining or just stealing crypto.
You are probably right. I'd say I assumed it was similar to session/auth/click jacking, where jacking is short for hijacking.

ByteDoktor - July 18, 2025, 2:14 pm

Cryptojacking is when you used infected machines to mine crypto, its usually xmr.

Why is it that hard?

DramaKing - July 19, 2025, 3:14 am

(Jul 18, 2025 10:12 PM)asura77 Wrote: [\[CITE\]](#) Why is it that hard?
Getting people to run malware and keeping it from being deleted is hard.

asura77 - July 19, 2025, 3:45 am

(Jul 19, 2025 03:14 AM)DramaKing Wrote: [\[CITE\]](#) Getting people to run malware and keeping it from being deleted is hard.

Cant you infect and spread them by attaching it to Pirated game files? why will get deleted? antivirus will delete it?

Or the users when they hear their computer fans running at full speed. Also, even if your file is FUD and has a rootkit, AV will upload samples, and soon there will be a definition for your file, causing AV to quash it. Maybe you can use a RAT as a first stage to deploy the miner and create an AV exception and maybe not. Then, too, at least one person here had a suspected miner, and I think did a clean install of Windows to get rid of it.

Run at 80% so no fan sound and ye make malware so strong that can bypass av duhh and keep spreading spreading one virus gone 1 more pops up.I also got an idea when i was sleeping you know we think & imagine lots of sh*t when we go to sleep so i had this idea of making simps run the command themselves in order to give them pics and etc. i know it would be time consuming or 99% would fail but thats an idea.

Also old pc's are more easy to prone to become silent miner such pc's that run windows xp so security ass.0.5% of pc's in this world is running windows xp.

Oh, duh. Sure, you go ahead and cryptojacking old PCs. If you lose money, it's on you. And your idea? It's all over cybersecurity blogs and news sites right now.

Err0rX - July 19, 2025, 8:46 am

Trust me, if it really worked like that, it would've been easier, and way more profitable.

You writing your own malware? You just didn't seem like the type.
