Why would people use your service versus a reputable company like Coinbase or Kraken?

Edit: OP is looking for advertisers

To be honest, I don't know why they should use my service, but I need to at least recoup the costs of setting up the exchange!

Ok, well first off I apologize for posting the first sentence. Everyone deserves a fair chance, but it's so easy for members to be taken advantage of because of a shiny interactive new website.

What are the pros and cons that you can label for potential customers? I believe this should also go into the Currency Exchange section if this is your entire service. I believe you need to upgrade to Vendor here, <https://hackforums.net/vendorapply.php> if you want to post off-site communication

I haven't studied your forum thoroughly yet and may be mistaken, but I am looking for people who will advertise for me.

I see why this is jobs and partnerships now. You are looking for someone with a social media presence to help promote your business. I thought that is what you were looking for originally, but edited my post.

You should post in the title of the thread "Looking for promoters"

I had just woken up and didn't read through your thread with all neurons firing.. Sorry to be so hasty posting. Best of luck looking for advertising with your P2P exchange

Thank you, I will correct that. Thank you for pointing it out.
