Thread: [Cookies are credentials!](#)

cad-syak - July 23, 2025, 11:48 pm

What can you do with a stolen browser cookie?

Everything:

Log in to Gmail, Office365, Slack, etc.

Skip MFA

Stay invisible (no failed logins)

Maintain access long after user changes password

Cookies are credentials.

Treat them like gold.

DramaKing - July 24, 2025, 8:58 am

Changing password should invalidate all sessions.

0x77ff - July 24, 2025, 12:44 pm

Many cookies are session based so make sure to utilise them quickly

Cookies are credentials.

Treat them like gold.

Stolen cookies can grant access to active sessions, but they have limits, they may expire, be tied to specific devices or IPs, and can't access encrypted chats or non-web services. If the user logs out or

the session is revoked, the cookie becomes useless.
