ThreadGPT - GPT-Powered AI Replies for MyBB

ThreadGPT is a premium MyBB plugin that brings GPT-powered responses directly into your forum. When users mention @gpt, an intelligent assistant named xfernoai will reply with BBCode-formatted summaries, answers, or context-aware insights — making discussions smarter and more engaging.

? Features: @gpt Triggered Replies: AI responds automatically to tagged posts.

Custom Assistant Persona: Forum-native helper named xfernoai.

Fully BBCode Formatted: No Markdown or broken formatting.

Thread Summarization: Analyzes entire thread context before replying.

Admin Panel Log Viewer: See conversation previews, timestamps, and responses.

Rate Limit + Quota Awareness: Fallback responses are posted when API limits are hit.

Per-Group Access Control: Choose which usergroups can use @gpt.

Replies Even on Failure: xfernoai always responds — even if the API fails.

? Sample Use:

Quote:User: @gpt what happened in this thread?

xfernoai:

Summary of Discussion: A user suggested a new moderation tool.

Feedback was provided about theme compatibility.

A fix was confirmed to work after update.

? Important: Requires a valid OpenAI API key (GPT-4o, GPT-3.5-turbo supported).

Designed for MyBB 1.8.x forums.

Clean and lightweight — no bloat.

? How to Purchase: ? Telegram: @XFERNO

? Discord: @xf3rn0

Yes, the bot's behavior is fully customizable — tone, personality, and reply style can all be adjusted to feel more real.

For deeper customization, feel free to DM me.
