kleenscan not free now

If you're looking for a free online scanner with a "No Distribution" option, there are still a few good services available, even though Kleenscan is no longer free. Antiscan.me is one of the best current options, it supports private scans and doesn't share your file with AV vendors if you select the no-distribution setting. Joe Sandbox (cloud basic) is another solid choice; it provides both static and dynamic analysis, and includes a "do not share with vendors" checkbox during upload. Triage (tria.ge) also offers detailed behavioral analysis and has a private mode if you create a free account. Just be sure to avoid platforms like VirusTotal or Hybrid Analysis for sensitive payloads, as they automatically distribute samples unless you're on a paid enterprise plan.
