Does this work for all gpt sites or only specific? Are you selling it to work only on 1-2 gpt sites or what?

What's this though? Completing surveys or this is macro script for the gpt site game tasks?

It has success across any gpt app or site so far i can provide a games list and proof for you if you dm me. Ive had the most success on adgate and mychips

do u offer any test plan ??

Hackerguymmp - July 27, 2025, 2:47 am

I can either offer you proof that i can credit an offer instantly by you providing me with your google adid or i can provide video evidence that it works i cannot allow access to it before payment as it would give you the entire thing i cant do trial runs that way but either of the two ways i recommended are sufficient. I also provide full detailed instructions on the installation as youll need python on mobile to run it. The price im asking is a fuxking steal.

Will show detailed proof before purchase

But what's to say that the GPT site won't suspend your account in the end? It's one thing to complete the survey instantly, but actually getting paid in the end, is what truly matters. I think you should give a vouch copy to someone like [Money-](#) since he inquired first.. this way he can vouch that 1. it works as described, and 2. that it won't get you suspended from said site.

If both of those are a success, and he can vouch for this.. I'm sure you will have many users ready to purchase.

You get paid i have proof it all depends how quick you complete offers

Send me a message il show you what is up
