I can't really say which is the most trusted vendor.. as there are many available on here, but I would recommend [JoseMar](#) for certain upgrades. He seems to be pretty well versed in providing upgrades, and has even given some tutorials on how to get some upgrades for free.

I'm buying like 3 years for me and my friends (10+ people) from [ACP](#) spotify and youtube upgrades. Never had any issues or kicks.

I'm working on a solution and will keep you updated if I have anything. I'm wary of recommending others in case anything goes wrong, but there are many upgraded and reputable sellers here who may be able to help as well.

Just remember, always use a contract & middleman if you're unsure of a sellers reputation.
