- 1 Start by entering your wallet address
- 2 Claim the daily reward which will be automatically sent to the entered wallet address from the previous step.

Link Below
Faucet . Scala . Network

If you have a wallet yet there's an option available
& you can deposit funds to an NO KYC exchange any time. Need less direction, this is an secured network with minimal effort for rewards, don't reap what you have the benefit of being rewarded.

Scala is the same scam that Pi is, just with a new name.

Mobile mining is not real, it's a gimmick, it adds no benefit to the network other than tricking you into thinking you're an active network participant. You're being farmed by a centralized entity.

Any network secured by "mobile mining" is not a secure network.
