? Suggestion: Add Profile Songs to HF Profiles?

Hey guys,

I recently made a plugin that lets users add a profile song to their account — works with Spotify, YouTube, TIDAL, and Deezer.

You just paste a track link in UserCP, get a live preview, and the song shows up on your profile as an embedded player.

Not sure if this kind of thing would fit Hack Forums, but I figured I'd throw it out there.

What do you think, guys?

Would adding a profile song feature to HF be a cool touch or just unnecessary?

? What it supports: Spotify, YouTube, Deezer, TIDAL

Live preview before saving

Simple and clean design

No core edits – fully plugin-based

I already have it working, just curious if people would actually want this kind of thing added here.

Would you use it?

Yakless - July 29, 2025, 10:08 am

So, sort of like what Omni does on his profile, but more refined?

Considering you can already just throw a song in your bio, and I don't think your design would fit HF's current theme, I'd say it's not really worth adding, but let's see what other people think.

Thanks for the input. If the owner ever wants to implement it, I can redesign it to match HF's theme

perfectly.

You can add a video to your profile i think

Dont know if other is even possible

SoulZeh - July 29, 2025, 1:01 pm

I swear it's pretty much already implemented, on users BIOS you can add music like mine.

Agent Shark - July 29, 2025, 1:08 pm

Starting to feel like MySpace with this... next week should have our top 10 friends.

But I think maybe he means that the song will autoplay when you view user's profile, a bit like a tumblr format? Not too sure though.

So if you click on your name at top left, then where it says "My bio box" on the right hand side you have the "..." click that then add a song from yt/sc with the code
[yt]link[/yt]

how to add spotify songs?

Omniscient - July 30, 2025, 11:30 am

You can embed either a Youtube video (song) or even Soundcloud into your profile.

Nobody should force music to be played when a web page opens. That's just rude.

Agreed autoplay is annoying. We can just disable it. Also, would be cool to support Spotify embeds too!

You can now embed spotify, just paste the link to track|album|playlist|artist|show|episode.
