Hello everyone

So i need some followers on fake linked in account

Not my main one for sure , i have legit ones on it , i need on a fake one

Even any follow for follow sites or anything ?

What's the approximate amount of followers that you're looking for?

Hey, I don't know of any guaranteed tools for LinkedIn followers since the platform is pretty strict, but what works best is engaging in niche groups and slowly connecting with people in your target field. If you're experimenting with a side account, maybe try joining interest-based groups or content pods people are usually open to mutual engagement there.
