Want to make money on Telegram? Become a scammer, with the rest of the scammers that hang out on there.. jk.

But in all seriousness, why Telegram? If your goal is to earn money online, and you would like to earn it from Social Media... Telegram isn't the first platform I would start off with. If you're going to sell on Telegram, you should already have your service and/or product that you're planning on selling.. in which you can just setup a Channel for sales, or use a Telegram bot to handle the sales of the product. But if you're not already having a service or product already that you want to sell, then it would be easier for you to earn money from one of the traditional Social Media platforms.. that already have monetization programs readily available for you to earn from. Only monetization programs that Telegram has that I'm aware of is Telegram Stars.. in which you can sell content, hide it behind a paywall, and the buyers would use Telegram Stars to unlock the content. You then would cash out on the Stars at a later date.
