Hey, I'm interested in doing this! My Xbox recently got stolen a month ago right out of my house done by my ex house manager that came in and took it. I had a camera in the room so the guy is in jail right now and I won't get my Xbox back they recovered from a pawn shop until his case is over and it's not evidence. BUT, I have a laptop I can use for this. Question: Would I have to make a fresh Xbox account or would it work on my account I used for my Xbox, I'm pretty sure my first month I got for it was a trial month I purchased on eBay or whatever. Would I need to make a new account? Regardless, I'd like to check this out, I'll start a contract in a little while, waiting for your response

Thanks and glws as well!!

To bad to hear the news about your xbox getting stolen. ?

I think these only work on NEW accounts and they ONLY FOR PC. Thanks.

Do they expire? I want to get one and activate tomorrow or a few days on a new account

And have another and save it for whatever time in the future.

If I got into a game and played it a lot, it sucks id have to make a new account to get another month at this cost, and start over in the game

If theres anyway around that let me know

Thanks

Also, how long will this be available?

I am not sure how long it will last, until I sell out, selling on other places also...

I can sell you 2 codes no problem but I am not sure when they expire though, I know on xbox consoles there is a trick where you can keep the games on your main account and activate the trial on a second account and change it to primary account on console then switch back and forth to keep all your main accounts games or something like that but I do not think this works on PC :(

I mean at this price you have nothing to lose, each code is guaranteed to last a month or I refund.

I bought two and they work, I got my codes instantly after paying OP. Smooth as usual and happy about the price for this being low as it is. I suggest if you play Xbox, this would be a cheaper route for paying for membership.

Thanks again!

Thanks, also the codes DO NOT WORK for the XBOX CONSOLE, they are for the Xbox PC APP.

Just wanted to clear this up.
