Thread: [APK FUD ENCRYPTION | BYPASS PLAY PROTECT APP BLOCKED](#)

**DarkLords\_Malware** - July 29, 2025, 10:42 pm

# VendeTTa PVT ( R E D - V e r s i o n v 6.1 ) ?

- Secure & Smart -Server-Based App Loader ?

# APK MALWARE PROTECTION TECHNOLOGIES

VendeTTa PVT is a server-based tool that uses a loader app to download and install other apps directly from the server. Each app is encrypted and obfuscated to

# Bypass Play Protect And Android Antivirus

[illegible]

## ? App Install from Server

Loads and installs apps (APKs) directly from your server using a special loader.

## ? Encrypted APK from Server

APK comes from the server in encrypted form, making it hard for antivirus or Play Protect to detect.

## ? New APK for Every Device

Creates a fresh APK with a different signature for every device and every install request to avoid detection.

## ? Support for Many APKs

Handles multiple APKs easily, and each one can be tracked using your Telegram bot.

? Sends Info to Telegram

Sends device details (like model, version, etc.) and install status updates straight to your Telegram bot.

## ? Bypasses Play Protect & Antivirus

Smart methods are used to bypass Google Play Protect and most Android antivirus apps.

## ? Permission Force Retry

If the user denies any permission, it asks again and again until it is allowed.

## ? Auto Retry If Install Cancelled

If the user cancels the installation, it keeps trying with a new APK until the app gets installed.

? Extra Custom Options:

## ? Custom Dropper Screen

You can design your own screen inside the dropper — change colors, text, images, buttons as per your choice.

? After Accessibility is Enabled:? Show a WebView page inside the dropper

? Or directly launch the main payload app

? Or change dropper icon/name to a real app (like Play Store or others). When the user taps it, the real app opens to avoid suspicion

## SCAN RESULT --

? Pricing & Terms

? Plans:

? Monthly Plan Full access to all features

Billing starts only when your server is live and running

? Trial Plan (Weekly) All features same as the monthly version

Valid for 7 days — good for testing performance

? APK & Server Details:

? Unlimited APK Upload Add unlimited APKs as needed

Pricing is adjusted based on the number of APKs

More APKs = Lower cost per APK

? APK Patching & Replacement If your APK gets patched at any time during the active month, free instant replacement will be provided

Unlimited replacements during the valid server period

? APK Performance (Tested) In testing, an APK worked for 20+ days with 1000+ clicks

We do not guarantee 20 days, but offer free replacement anytime it's patched while your server is active

? Pricing Breakdown: ? Server Setup (Anti-Ban Server) – \$500 One-Time

High-quality private server with anti-ban features

? APK Monthly Cost – \$1000 / APK

Very low detection rate

Works fast and may stay active 5–15+ days (based on traffic and environment)

& free replacement system

? Discounts on Multiple APKs

If you need 2 or more APKs, price can be adjusted — custom discount available

? Payment & Security: Escrow is always accepted for safe and trusted transactions.
