Cyber Loader

The only FUD loader in the market!

Key Features:

- HTTP-Based Control Panel: Seamlessly manage and monitor bots with a clean, real-time web interface.
- Loader Functionality: Download and execute, remote powershell, reverse proxy.
- Fully Undetectable (FUD): Out-of-the-box stealth with built-in AV/EDR evasion—no third-party crypting needed.
- BotKill Module: Detects and terminates other RATs, stealers, and suspicious activity.
- We work for you! We're ready to build any feature you have in mind—just contact us to request a custom addition and get a quote.

? Features ?

? Stable Remote Connection

Always-on control. No drops. No nonsense.

Smooth and Fast transaction.

Bypassed Windows Defender and Avast.

Very Good Dev too, He's on standby ready to assist, I couldn't ask for anything more.

Bro says the only FUD loader but also Weekly access does not include a FUD (Fully Undetectable) file. A separate crypter must be used to obtain a clean file.

This is a C2. This is not a loader. A loader is the injector that runs bypasses and sticks your C2 into memory, this is a C2.

Bro spent more time making the UI and licensing system than he did making the tool. Classic tool here on HF.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
