Cyber Products - August 1, 2025, 6:07 pm

? Cyber LNK Exploit ?

The most advanced .LNK exploit delivery system on the market — stealthy, flexible, and built for professionals.

? Features:

- HTTP-Based Builder Panel: Create, manage, and download builds from a clean web-based interface — no Skills required.
- Smart Icon + Extension Spoofing: Spoof popular file types (PDF, DOCX, PNG, etc.) with over 100 realistic icons for high click rates.
- Drag & Drop + Direct Link Builder: Instantly wrap your payload — just upload and click build.
- Decoy File Dropper: Drop a real-looking document or image post-execution to reduce suspicion.
- Fake Error Message: Show a fake crash or system popup after payload execution.
- Sandbox & VM Detection: Auto-terminates when run in a virtual or sandboxed environment.
- Geo-Fencing Rules: Restrict execution based on country or IP range.
- No .NET or Dependencies: 100% native — works on clean Windows 10/11 machines.
- Execution Logging: Receive real-time logs (IP, OS, timestamp) via Telegram.
- Custom Feature Development: Need something unique? Contact us for private builds.

Taking a Vouch Copy without dropping a review should have a penalty.

3 Vouch copies given already as claimed by developer and not a single review.

0xElPadrino is the only one with a contract for vouch.

0xElPadrino drop review for the vouch copy given to you on 8th August

Huge update!

1,500+ New Icons has been added.

more than 10+ different extensions!

Cleaned the builder for the newest windows defender security update.

Added an option to add a decoy file, you can now do receipt.pdf that will open a real pdf file + your payload at the same time!

simonoverleak341 - August 27, 2025, 5:20 pm

Looks great. Would you be open to adding a weekly access tier at an appropriate price?

Also, will this bypass SmartScreen?

Starting 1st September, with the release of our new feature, the Cyber Exploit builder subscription will be priced at \$1,250/month to match our competitors pricing.

? Access to 15+ extensions (includes .url exploit)

? Full support for .doc, .xls, .ppt and more office exploits.

? Fully FUD and Bypass smartscreen.

? Using a new way to use your non crypted file, you no longer need a FUD file to spread.

? My exploit will first use UAC bypass to gain admin access, then add c:// to Exclusion then download the non FUD payload.

? Each customer will receive a unique linux host to auto host their files for direct link.

simonoverleak341 - August 28, 2025, 4:37 pm

What does the builder actually output? Just a single LNK file? Or an LNK in a ZIP along with other (DLL?) files?

if uploaded to mega.nz or google drive yes, it will show a popup.

otherwise it must be zipped and successfully sent via email.

the reason it can be sent because it is FUD. also the reason you cannot upload the file as it is because it is a shortcut.

it's an exploit to infect pcs, rather with a rat/stealer/botnet.

price is cheapest in market currently our competitors sells one build for 300\$, we sell builder unlimited builds for 250\$.

we are increasing to 1,250\$/month after the next update that includes office macro + landing pages + symlink.

kiudecfrox - September 20, 2025, 7:48 am

I am interested but looking more for a per build option price you don't have that?

Only monthly packages, it includes unlimited builds per file.

Other sellers selling 100\$/file, i sell 250\$/month unlimited files and builds.

I managed to have 2 weeks of it and this is lovely! Ink,url,script and exploit method can be selected. You can decoy a real file or not. I faced some detected and proposed to get the exploit file to generate a unique stub (crypt them) And it got added under a day! It's now totally undetected and ready to pwn your target without moderation! You can even make some combo Ink using it and this is wild! i will upload media shortly :)

Great work Cyber
