Thread: [introducing me](#)

ghooster38 - August 4, 2025, 3:38 am

Hello. I'm Ghooster. I like hacking related stuff, but im a total beginner when it comes to computer hacking related stuff. I like to break in to stuff, locks, this or that... I just bought a deftun reader writer. im hoping to learn as much as i can about that for now. I live in california in the high desert.

Welcome to Hackforums, [ghooster38](#) !

We're glad to have you join our community!

As you start exploring, we highly recommend taking a few moments to familiarize yourself with the forum. These resources will help you get off on the right foot:

Etiquette & Rules:

Read through our [Help Docs](#) to understand the forum's rules, etiquette, and features. This will save you a lot of trouble down the line.

Stay Safe! Protect Yourself:

If you plan on buying, selling, or trading on Hackforums, always remember:
Keep all deals on-site. Do not move to Discord, Telegram, or any other platform to finalize deals or discuss them further. If something goes wrong, staff cannot help you unless the full conversation happened here.

Use the [Contract System](#) for any deal, big or small. It documents everything and helps prevent misunderstandings.

Use a [Free Middleman](#) for added security. Scammers hate middlemen for a reason. Sellers can NOT refuse one!

Never send money or items before verifying a user's reputation. Even then, trust should be earned, not assumed.

If you have questions, Be sure to ask [The Academy](#) group! Plenty of members are happy to help.

Enjoy your stay, and again welcome aboard!

As for making money, my advice would be to automate something that people are looking for.

Welcome to HackForums [ghooster38](#) !

From your introduction, it sounds like you've stumbled upon the right place.. as you already have a liking for hacking related stuff, and breaking into things. Nice of you to join us. Take a few minutes and read thru the [Help Docs](#), so you understand the rules of the site. May seem cliché, but it's easy to overlook one of the rules.. pretty sure they have to give out at least 1 warning everyday, if not multiple.

If you're really enjoying the site, take the time to [upgrade](#) your account. [Upgrading](#) is a great way to not only show support for the site, but also a way that you can unlock some additional features and options that are not readily available to you as a regular user. I'm sure you've noticed that some users have extra graphics and such, attached to their profile when viewing them in the thread, [upgrading](#) is one way to achieve this. No force, but certainly something to consider.

See you around the site.
