Thread: [#1 Elite Web Solutions - Scalable - Secure - AI-Powered | Limited Free PoCs](#)

Oh_Well - August 16, 2025, 12:40 pm

Elite-Grade Web Solutions
Knowledge Graphs & Graph-RAG Intelligence
Quantum-Resistant Security
High-Performance Cloud Architecture

• STARTING FRESH • BUILDING TRUST •

Due to anonymity requirements, showcasing existing solutions is not possible. So I'm establishing a new presence in the community.

To demonstrate capabilities and build trust, I'm offering COMPLETELY FREE proof-of-concepts to the first interested people who are trusted members and can provide reviews/vouches.

? No upfront costs • No hidden fees • No obligations

? Limited time offer • Send me a message to discuss - Will start a contract after we define the PoC scope ?

• SERVICES •

• WHAT YOU GET •

With deep experience collaborating with Defense Contractors, Law Firms, and Intelligence Organizations in the public sector,
I design end-to-end systems that bridge real-world challenges with strategic innovation.

What you gain are high-performance solutions, from post-quantum encryption to AI-driven intelligence, all engineered to endure and evolve.

o Zero-knowledge architectures o Military-grade encryption o Future-ready resilience

• PRICING •

After initial contact and requirements extraction, a proper SoW will be conducted that clearly indicates scope, deliverables and pricing.

Prices at a glance

? QUANTUM-RESISTANT SECURITY SOLUTIONS ([Click to View](#))

PREPARE FOR THE QUANTUM FUTUREKyber (KEM) & Dilithium (Signatures)

Zero-knowledge multi-party file sharing

Elite key management & HSM integration

Security audits & compliance reporting

Custom SDKs & API hardening

*All implementations follow NIST Post-Quantum Cryptography standards and industry best practices.

? AI-POWERED BUSINESS INTELLIGENCE ([Click to View](#))

DATA INTO STRATEGIC ADVANTAGEScenario modeling & stress testing

Monte Carlo simulations for risk

NLP for document analysis

Real-time market intelligence & alerts

Predictive analytics & forecasting

? ELITE APPLICATION DEVELOPMENT [\(Click to View\)](#)

SCALABLE • SECURE • MAINTAINABLE Custom API development and system integrations

Responsive web applications tailored to business needs

Interactive dashboards with real-time data visualization

Mobile-first solutions for iOS and Android

User-centric design with accessibility best practices

? CLOUD INFRASTRUCTURE & DEVOPS [\(Click to View\)](#)

ENTERPRISE CLOUD OPS Multi-region AWS with high availability

IaC: Terraform & AWS CDK

Automated CI/CD with security scanning

Monitoring, logging, alerting

Disaster recovery & continuity

? DATA ANALYTICS & BI [\(Click to View\)](#)

DATA-DRIVEN DECISIONS

Complete pipelines from ingestion to visualization: warehousing, ETL, executive dashboards, automated report generation, collaborative WYSIWYG editors.

Custom pricing based on data volume and complexity

Small projects like simple landing pages can be paid with ?ytes

• DEVELOPMENT PIPELINE •

Requirements Extraction -> Technical Discovery -> Architecture Design -> Implementation -> Comprehensive Testing & Vulnerability Assessment -> Deployment, Monitoring & Performance Optimization

Agile sprints • Encrypted communications • Weekly milestone reviews

QUALITY & PARTNERSHIP

- ? Code quality guarantee
- ? Security audit included
- ? Documentation & training
- ? Ongoing support options
- ? Transparent communication

Confidential consultation & detailed proposal. All deals and communications are on-site - if I send a telegram message first - it's not me.

Send me a message to discuss before initiating a contract.

Clarifying a few things:

Q1: Do you also work on WordPress websites, landing pages, portfolio websites, or small eShops?

Spoiler [\(Click to View\)](#)

Yes, I'm also working on WordPress websites, landing pages, portfolio websites, and small eShops. These projects are paid in bytes.

Q2: What is the payment method for your services?

Spoiler [\(Click to View\)](#)

As mentioned in Q1, smaller projects will be paid in bytes.

The rest of the services will be paid with Crypto or Paypal based on final pricing and convenience.

Q3: Do your deals include full Figma designs?

Spoiler [\(Click to View\)](#)

No, full Figma designs are not included by default in any deal. If needed, it must be discussed separately and explicitly added to the project scope.

Q4: Is discussing project details here considered a consulting service?

Spoiler [\(Click to View\)](#)

No, general discussions here are not considered part of a consulting service.

Q5: Are you offering any free services right now?

Spoiler [\(Click to View\)](#)

Yes. As part of establishing a new presence in the community, I'm offering COMPLETELY FREE proof-of-concepts (PoCs) to a few trusted members who can provide honest reviews or vouches. No upfront costs, no hidden fees, no obligations.

Q6: Who owns the code during development?

Spoiler [\(Click to View\)](#)

Ownership of the code remains with me during the development phase. You'll have visibility into progress and outcomes, but full rights are only transferred upon successful delivery and payment.

Q7: Who owns the code after the project is delivered?

Spoiler [\(Click to View\)](#)

You do. Upon full payment and completion of the project, all rights to the code, assets, and deliverables are transferred to you - unless otherwise agreed upon in writing. You're free to modify, reuse, or expand the solution as you see fit.
