Thread: [To grab WhatsApp web chats](#)

Footer - August 8, 2025, 5:31 am

I need to provide proof that my boss is bullying me severely. I need to export his WhatsApp chats from the WhatsApp web app.

I can take advantage of his brief absences (a few minutes) to install a virus on his unlocked computer that will allow me to export all his WhatsApp chats. I don't have enough time to copy and paste the text and send it to myself or take screenshots. I only have enough time to insert a USB stick and run the executable file.

Does anyone know of a virus like this? He has Bitdefender endpoint security tools antivirus.

DramaKing - August 8, 2025, 8:38 am

I can code something simple that will copy the WhatsApp folder in AppData in DuckyScript. BitDefender won't have anything to say about a file copy. Nothing else will work.

Best case you get yourself fired the minute that he finds out. You think that he's talking about you behind your back or something? Usually bullying is done directly to a person.

OP keep in mind that anything you obtained illegally will not be admissible in courts or by police. For proof start taking screenshots of his behavior.
