When you say that it bypasses smartscreen, I assume that the exe is EV signed? The static scan certainly looks good, but I'll test it if you'll provide a vouch copy.

Hello Dramaking, Sideload of crypt does bypass smartscreen because it inject your exe into DLL and side load it with ev signed application

I sent you a pm on telegram regarding the vouch copy

My files are 3 days guaranteed, you cannot tell me that everything its working perfectly

<https://prnt.sc/rARdxxnaqs7p>

And more than 1 week later, comeback saying that its not working

My files are 3 DAYS GUARANTEED, not 1 week, not 2 weeks, not 1month

If you tell me that its not working in the following 3 days, I just refund you or encrypt again for free

Now you trying to ruin my reputation because I don't want to do business with you again and that I was the only person able to encrypt your payload
