It uses a ubuntu linux terminal for starters and you can connect direct to manus's computer and attach apps and have it control your computer all sorts of awesome stuff. It is freaky crazy stuff for scraping website and the internet and other tedious tasks, but eats credits up so fast!

I will be adding new promo codes for September soon!

If you have any questions about more of with this AI can do?

Feel free to ask!

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
