I do not need the accounts. I am just saying 21 days old accounts for 2 Usd is higher price. People can simply wait 21 days and use the otp verification to have it.

Basically, the more you buy, the cheaper it gets. For example, if your time is worth only a few cents, then sure, you could make it work by waiting. But I'd love to see how you manage to collect 100–500 accounts this way without getting banned! Also, keep in mind, every account you register will need email verification. As for the 21+ days thing, that means the accounts could be anywhere from 1 to 4 months old. People who buy stuff like this typically want it right away, without wasting any time or energy, since they're using it to build something bigger!
