Both personal and business use

Número eSIM (Android/iOS)

Free plan (ad-based) & paid plans

Good for combining travel with privacy

Temporary SMS Verification / Disposable Numbers

SMSPVA

Real SIM-based numbers for major EU countries

AnonymSMS

Free, public EU numbers for SMS receiving

Private rentals available for 1–30 days

Special Considerations for the EU

EU-origin services like OnOff and Number People help ensure full GDPR compliance and higher privacy standards.

Major US options (e.g., Burner, MySudo, Google Voice) have little or no EU support; only the above-listed apps reliably provide EU phone numbers.

EU regulations (GDPR, future digital identity projects) do impact phone number services—choose EU-based providers for best privacy.

Recommendations by Purpose

Privacy-first: Hushed

EU built/business: OnOff

UK-specific: Number People

International/Travel: Numero eSIM

SMS Verifications: SMSPVA, AnonymSMS

These options are reliably available for users in the European Union on both Android and iPhone platforms, with free trial periods or free basic plans as noted.

Nice high quality share. With most platforms requiring SMS verification, this information is beyond beneficial in the hands of the right person. Great value, thanks for taking the time to put this together.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Is the flyp 100 day trial worth it? Is it free numbers or is it a seller place? When searching for it it sounds like a reseller market tool
