Lost your crypto password or seed phrase? Here's what actually works in 2025

Lost your seed phrase or crypto wallet password in 2025? You're not alone. Recovery might still be possible.

Losing your crypto password or seed phrase is scary, honestly. Feels like dropping your house keys down a storm drain.?

Good to know there are still some potential options in 2025

Mewtwo - September 3, 2025, 2:23 pm

If you have a .dat or json file, at least that's a hope to ever recover your crypto files, even if you lost your password. At least it gives you a sense of hope that one day, you'll get your crypto back, whether brute forcing now or waiting 20-30 years for technology to advance.

Interesting but I wonder how secure these recovery methods really are.

sharn - September 6, 2025, 12:08 pm

Losing both the password and seed phrase for a non-custodial wallet often means permanent loss. It is essential to back up your recovery information securely.
