**AwsVenn** - August 18, 2025, 12:42 pm

Hey everyone!

I'm excited to finally be part of the HF community. I've been browsing the forum for a while and have learned a lot from the amazing discussions here.

A bit about me I specialize in Amazon Web Services (AWS) with a focus on EC2 and SES. I've spent the last few years building and managing reliable, scalable cloud environments for businesses that rely on solid backend systems and high email deliverability.

I am just happy to be in a place full of smart and creative minds.

Looking forward to engaging in tech discussions, sharing some of what I know, and picking up new skills from the pros here.

Thanks for having me!

Welcome to Hackforums, [AwsVenn](#) !

We're glad to have you join our community!

As you start exploring, we highly recommend taking a few moments to familiarize yourself with the forum. These resources will help you get off on the right foot:

Etiquette & Rules:

Read through our [Help Docs](#) to understand the forum's rules, etiquette, and features. This will save you a lot of trouble down the line.

Stay Safe! Protect Yourself:

If you plan on buying, selling, or trading on Hackforums, always remember:  
Keep all deals on-site. Do not move to Discord, Telegram, or any other platform to finalize deals or discuss them further. If something goes wrong, it will be harder to help or verify who you dealt with.

Use the [Contract System](#) for any deal, big or small. It documents everything and helps prevent misunderstandings.

Use a [Free Middleman](#) for added security. Scammers hate middlemen for a reason. Sellers can NOT refuse one!

Never send money or items before verifying a user's reputation. Even then, trust should be earned, not assumed.

If you have questions, Be sure to ask [The Academy](#) group! Plenty of members are happy to help.

Enjoy your stay, and again welcome aboard!
